

PLANO SKIES SOLAR PROJECT

Bring on the Sunshine, Kendall County!

Plano Skies Energy Center, LLC is proposing an up to 250 MW solar energy facility in Kendall County, bringing many positive impacts to the local economy and community.

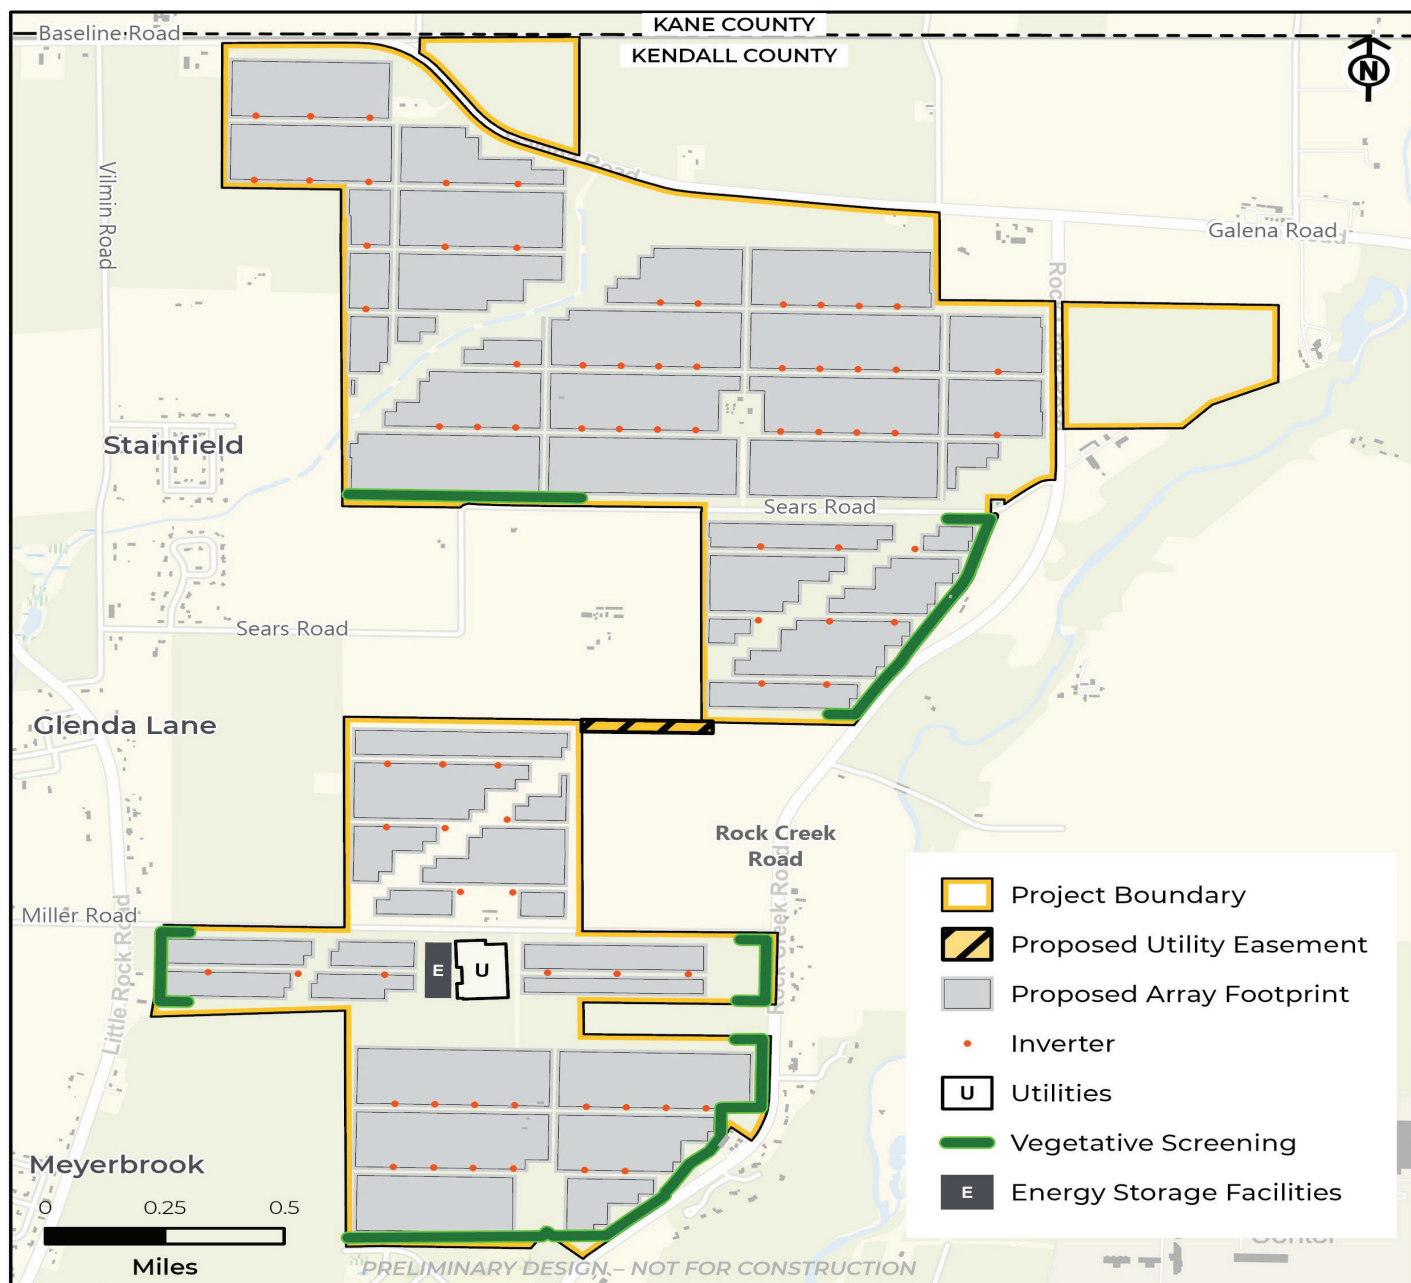

A solar project provides a healthy, productive economic development opportunity for local land to harvest a stable cash crop – the sun.

We are excited to be working in partnership with the Plano community on an opportunity to host a clean, environmentally compatible, renewable energy generation facility.

PLANO SKIES SOLAR PROJECT

The Benefits of Going Solar in Kendall County:

- Impacts to the local economy through stable revenues to local governments and other services
- Boosts local business; creates new jobs during construction
- Quiet renewable energy generator without emissions
- Will not increase local traffic during operations or create a burden on municipal services (i.e. sewer, water, emergency services, etc.)
- Clean, renewable energy has a beneficial impact on the environment
- Provides an abundant, earth-friendly, sustainable power resource to help stabilize electricity costs
- Contributes to the diversification of the nation's electricity grid
- Requires minimal water consumption during construction and operations
